Team Details

- Team name – Constant learning
- Team leader name – Nitin kumar prajapati
- Problem Statement – Ai & cyber security and privacy

Brief about the idea

We build a website using streamlite cloud that works on both web browser and mobile phone , where you upload you picture and get the percentage of how much your photo is fake , that is fake percentage of it

Opportunities

- How different is it from any of the other existing ideas?
- How will it be able to solve the problem?
- USP of the proposed solution

It works on both pc and mobile phone

It works smooth

Give percentage

We dont invest any money

Used free tools and public available resources

User friendly

Usp is we try our best as much we can

List of features offered by the solution

No need to install it on your phone

Works where you have internet connection

Works on every type of phone except ios user

Works 24X7

Any type of images it can detect and give percentage

Simple user interface

Process flow diagram or Use-case diagram

Just try our link below

<https://deep-fake-demo-enkyugpbflhg469elfktgg.streamlit.app/>

Wireframes/Mock diagrams of the proposed solution (optional)

Not applicable in our case

Architecture diagram of the proposed solution

Not applicable in our case

Technologies to be used in the solution

Python

Streamlit and its cloud

Git and github for hosting

Jupyter notebook for python demos

Filmora for screen recording

Chatgpt

Gemini

Different type of phone models and pc except ios models

Ngrok

Command panel

Usage of AMD Products/Solutions

Nothing we used amd features

Estimated implementation cost (optional)

Zero

Prototype Assets (Optional)

- GitHub Public Repository Link
- Demo Video Link (Max: 3 Minutes)

Already submitted earlier so please have a look there
Hope you understand
